U.S. army's main battle tank M1 Abrams is the only mass produced turbine powered land vehicle in the world. The decision to use gas turbines as the power source of the main battle tank was made in the circumstances that applying gas turbines to the tank was thought to be a wild scheme all over the world. In Soviet Union, main battle tank T80 adopted the gas turbine as its main power source but failed and next generation T90 was powered by diesels.
